DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

A copy of the third page of IDS filed on February 12, 2002 has been attached, as requested.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 22-35 are rejected under 35 USC § 103(a) over Smith in view of Nooy et al. or Chang et al. or Isogai et al. This rejection is set forth in the prior Office action mailed on June 5, 2003.

Response to Arguments

4. Applicant's arguments filed on November 04, 2003 have been fully considered but they are not persuasive.

Applicants argue that Smith teaches a cumbersome method of aldehyde modification and that the reference does not suggest the use of hydroxyl modification as claimed.

However, the examiner has rejected the claims based on a combination of references in which Smith teaches the fact that the wet strength of Cellulosic fibers increase when they are aldehyde modified. The secondary references teach a method of modifying Cellulosic fibers using hydroxyl radicals and teach the convenience of the modification, see prior action. Smith also teaches that the degree of oxidation can/could be controlled to desired levels. The examiner contends that one of ordinary skill in the would have reasonable expectation of success if Smith fibers are aldehyde modified as suggested by the secondary references. The reasons are explained in the prior office action.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986).

Applicants argue that the examiner has used improper hindsight to combine the references.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based

upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971).

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
